Jump to Target

as of release 3.27	prior to release 3.27

Function

This object performs a jump to a Target object in the routing application.

See also Target.

Both objects together can be used to eliminate long connector paths between objects in the application.

Parameters

Parameter	Purpose
Object Name	The name of this object instance
Target Object	The target object at which execution of the application should continue.

Outputs

This object has no outputs.

Release

3.14 FROM 05.05.2019
