GOTO

| as of release 3.27	prior to release 3.27
GOTO (138)	GOTO (27)

Function

Switches control from the running routing application to another routing application (to the active or the test version of the application). The entry point to the application is always the *Start* object.

Parameters

Object Name	The name of this object instance
Routing Application	Choose the routing application, to which control is to be passed
Language	Select a languange in which the routing application should run.

This object has no outputs.
