

Cost free queueing

as of release 3.27	prior to release 3.27
	

Function

Places the incoming call into the state “cost free queueing”, i.e. the following voice prompts are played during the “ringing” state. Please note, that this phase of cost free queueing should not exceed 2 minutes for technical reasons, as after two minutes the call will be terminated by the network. The call should, therefore, be transferred to a destination (for example by using the *Connect* object) or be answered using the *Offhook* object.

Parameters

Object Name	The name of this object instance
-------------	----------------------------------

Outputs

Output	Used when ...
Continue	Always
