

Call Center Adapter Installation

Call Center Adapter Definition File

To integrate the jtel Micro-Client into the SalesForce installation, a Call Center Adapter Definition file must be supplied.

This file must be modified, to correspond to the actual jtel Installation being used.

https

The jtel webserver must be running https with a valid certificate!

Here is an example file:

jtel SalesForce Call Center Adapter Definition File

```
<callCenter>
    <section sortOrder="0" name="reqGeneralInfo" label="General Information">
        <item sortOrder="0" name="reqInternalName" label="InternalNameAAA">jtelACDAdapter</item>
        <item sortOrder="1" name="reqDisplayName" label="Display Name">jtel ACD SalesForce Adapter</item>
        <item sortOrder="2" name="reqAdapterUrl" label="CTI Adapter URL">https://jtel-server/CarrierPortal/micrologin/reseller-uid/client-uid</item>
        <item sortOrder="3" name="reqUseApi" label="Use CTI API">true</item>
        <item sortOrder="4" name="reqSoftphoneHeight" label="Softphone Height">650</item>
        <item sortOrder="5" name="reqSoftphoneWidth" label="Softphone Width">200</item>
        <item sortOrder="6" name="reqSalesforceCompatibilityMode" label="UI Compatibility Mode">Classic_and_Lightning</item>
    </section>
    <section sortOrder="1" name="reqDialingOptions" label="Dialing Options">
        <item sortOrder="0" name="reqOutsidePrefix" label="Outside Prefix"></item>
        <item sortOrder="1" name="reqLongDistPrefix" label="Long Distance Prefix">0</item>
        <item sortOrder="2" name="reqInternationalPrefix" label="International Prefix">00</item>
    </section>
</callCenter>
```

The CTI Adapter URL must be modified. The parameters:

- jtel-server
- reseller-uid
- client-uid

must be specified.

Save the file to the local disk.

Import Adapter to SalesForce

Select Setup on the top right.

In the quick search field type in "call", and select the option "Call Centers".

call

Build

Customize

Call Center

- Call Centers
- Directory Numbers
- Softphone Layouts

In the following screen, select "Continue".

In the next screen, select "Import".

Quick Find / Search...

Expand All | Collapse All

All Call Centers

Help for this Page

A call center corresponds to a single computer-telephony integration (CTI) system already in place at your organization. Salesforce.com users must be assigned to a call center before they can use any Call Center features.

Name	Version	Created Date	Last Modified Date
Import			
No records to display.			

Lightning Experience Migration Assistant
Switch to the modern, intelligent Salesforce.
[Get Started](#)

Then select "Choose File", select the file, and import it.

In the following screen, select "Manage Call Center Users":

Call Center

Call Center Detail

[Edit](#) [Delete](#) [Clone](#)

General Information

InternalNameAAA	jtelACDAdapter
Display Name	jtel ACD SalesForce Adapter
CTI Adapter URL	https://jtel-server/CarrierPortal/micrologin/reseller-uid/client-uid
Use CTI API	true
Softphone Height	650
Softphone Width	200

Dialing Options

Outside Prefix	
Long Distance Prefix	0
International Prefix	00

Call Center Users	
Manage Call Center Users	
Call Center Users by Profile	
Total	0

Add the required users to the call center (including the supplied test user!).

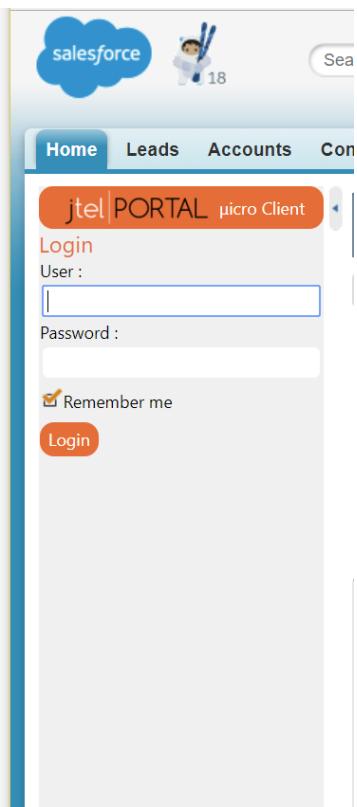

Test the integration, by clicking on Home. (This only applies to the "classic" mode, in "lightning" an App needs to be created, see section "lightning")

The jtel Micro-Client should be displayed in SalesForce.

If necessary, expand the sidebar using the indicated button:

The screenshot shows a CRM application's home screen. At the top, there is a navigation bar with tabs: Home, Leads, Accounts, Contacts, Opportunities, and a fourth tab which is partially visible. Below the navigation bar, a user profile is displayed for "Lewis Graham" with a blue circular icon. A red circle highlights this icon. The date "Wednesday 15. November 2017" is shown below the profile. Below the profile, there is a "Hide Feed" button with a blue border. Underneath the feed button, there are four action buttons: Post, File, Question, and More. A search bar follows, containing the placeholder text "Share an update, @mention someone...". At the bottom of the feed area, there is a search icon and a "Sort By Most Recent Activity" dropdown.

The login page should be displayed as follows (only user and password).

If this is not the case, then the URL setup in the Call Center Adapter needs changing to the reseller-uid and client-uid.

If nothing is displayed, most likely the jtel Server is not running with https.

SalesForce will **NOT** work with a http installation of the jtel Server.
