Editing a Routing Plan and Rules

In the list of Routing Plans select

- **Edit**, to change a routing plan
- **Delete**, to delete a routing plan
- **Copy**, to create and edit a copy of the routing plan

Edit

Use the tab **Master Data** to activate and deactivate the plan.

On the **Rules** tab you can view all rules which exist in this plan.

In the table of rules you can use **Edit** to change the data in a particular rule.

You can, for example, specify the time parameters more closely. Otherwise, the screen is the same as when a rule is created.
