

Master Data REST API - Languages Functions

- [Retrieve all Languages](#)

Retrieve all Languages

This function retrieves all languages from the client account.

URL

```
GET {baseURL}/languages
```

Parameters

None

Responses

If the request is performed, 200 OK is returned. See [Return Codes](#) for further possible status codes.

Returned Data (200 OK)

A JSON Structure containing the following fields:

Field	Type	Data
filter	String	The applied filter. This is reserved for future use.
limitStart	Integer	The first record index. Currently 0, reserved for future use.
limitPageSize	Integer	The number of records. -1 indicates all records. Reserved for future use.
records	Languages []	An array of languages.
count	Integer	The number of records returned.
orderBy	String	The field used to sort the records.
ascending	Boolean	Whether the array of records is sorted ascending or descending.
status	Integer	The return code (also provided by the http status code).

Example

Note, the records array has been shortened for readability.

```
{
  "filter": "",
  "limitStart": 0,
  "limitPageSize": -1,
  "records": [
