

Create Group

To create a group, access **ACD - Groups** in the main menu and click on **New** in the toolbar.

Provide the following information:

Name	Name of the group
Group Number	<p>If the group to be created is an <i>Independent Group</i> or a <i>Configuration Group</i> a group number can be inserted here. This number is used, for example, when transferring calls by DTMF.</p> <p>If in the client specific resources the group number has been configured as obligatory, here a sensible suggestion will be provided The indication of the group number is obligatory in this case.</p>
Group type	<p>Select a Group type</p> <p><i>Independent Group</i> — An ACD Group with all possible settings. Choose this option if you want to configure the ACD for all types of callers in the same way, regardless of which of your clients the calls refer to.</p> <p><i>Configuration Group</i>- A group with limited settings. It is used to configure basic ACD parameters, e.g. the call flow. This group contains no agents. Choose this group if you have different clients whose callers should be routed seperately, should listen to different messages etc.</p> <p><i>Agent Group</i> - A group that contains only Agent settings. Here you determine for example which agents work on which subjects.</p> <p>During the installation of the ACD either opt for an independent group or for more pairs of configuration groups and agents.</p>
Foreign System ID	The foreign system ID of the ACD group can be specified here.

The following table shows how configuration groups, agent groups and standalone groups differ in the possible settings:

Possible Settings (Function, Parameters)	Configuration Group	Agent Group	Standalone Group
Master Data			
ID	x	x	x
Name	x	x	x
Group Number	x		x
Foreign System ID	x	x	x
Hide Group from Call Processing		x	x
Fax-ID	x		x
Fax-Headline	x		x
Primary Acd Agent Group	x		

Caller ID	x		x
Service Number for Direct Agent Calls	x		x

Display in Aggregation Group when less than Minimum		x	x
Agents		x	x
Skill Adjustment		x	x
Rules	x		x
Synonyms	x		x
External Destinations	x		x
Transaction Codes	x		x
Confluence		x	x

After entry click on **Save**. Thereby the group is created and you change to the mode **Edit**, where you can configure further settings for the group.

Alternatively, you can create a group by copying an existing group. To do this click on **Copy** instead of **New**.
